## **Report**

### **stay in Germany**

Dear ladies and gentlemen,

as part of the "Train-The-Trainer program" I have the ISG

Visited "International Summer Course for German Studies" at the University of Jena.

The course lasted from 02.08.2015 until 08.29.2015. But my stay in Germany / Jena began on 01/08/2015 and ended on 08/30/2015.

The course was Very well planned and organized. The Course was under the direction of Dr. Thomas Müller. In addition to language courses are Germanic themes of literature and linguistics part of the program.

Other priorities include events on the methodology / didactics of teaching German as a foreign language and also country- and Cultural Sciences subjects.

The course is not only interesting for German teachers and German teachers from all over the world - regardless of whether you teach at schools or colleges, but also for German students and - Studentinnen and all the people who would like to improve their German.

The summer course includes approximately 30 hours of German course per week (including working groups (workshops) and lectures).

After my arrival in Germany / Jena I was accepted by a tutor in Jena Hauptbahnhof.

On the first day of the course were about the course, the program of the course, as well as very knowledgeable about the city and the services in the city.

By sightseeing tours, which has been organized on the first days of the course the university, we got to know the city.

Based on the lectures and the didactic events, in which I have a regular there, I was able to know about me with different focal points with respect to (linguistics, didactics and methodology, voice and vocabulary acquisition and cultural studies).

My German language skills have improved and expanded during the stay and on the basis of the course, which runs next to it, as well as the contact with the German environment in Jena.

Since we had different lecturer / inside, who either taught or Lectures have held, we had a great opportunity to also different didactic and methodological kinds or types of teaching and presentations to know. That's why I was always as an observer or trainee.

Every day it was for me a good chance to me to deal not only with the German culture, but also to meet with different cultures from different countries (from Italy, Belgium, Russia, Bulgaria, China, Greece, the Urkanien and Slovakia).

Every week there was an excursion in the State "Thuringia" and once there was a in Dresden. This made my national heritage information reaching.

At the end of the course there was a small celebration. Since we got our course certificates and say goodbye to the instructors and tutors.

During my stay in Jena I lived in a student dormitory. Everything was also very well regulated in this respect.

At the end of my report, I would like to express my gratitude. Thanks to the "International Office" for any help. I am also grateful for the help from the Mr. Mühlberg.

My best thanks is also at the GJU and the GJU President who gave me the chance to expand my knowledge and to be able to gather some experience. I hope I can use this experience such at the GJU.

Amman, on 14/09/2015

Ahmad Sammak
