

## Testimonials of GJU students “My Year in Germany”

“The year that I spent in Germany was fantastic and very useful. It enabled me to get a lot of scientific practical experiences as well as identify new culture and a lot of friends”.

**Saif Aldeen Alsamarneh, Biomedical Engineering**

"I am proud to announce myself an alumni and pioneer of GJU. This five years experience has influenced me in ways I can't even describe. It has broadened my horizons and given me perspective. THANK YOU GJU! “

**Yousef Alhamid, Logistic Sciences**

"Jordanian youth has sure been relieved from military service, but this year abroad will bring more maturity to the exchange students than any military program. I now understand the meaning of the word responsibility and adulthood!"

**Waseem Ibrahim, Chemical – Pharmaceutical Engineering**

"My year in Germany has taught me how to practice theories in the real world."

**Rasmi Basyouni, Biomedical Engineering.**

"One year in Germany is a great experience and added a lot to my life. Today, I feel that am an open-minded balanced global student with more of long-life skills and attributes. I am now a risk-taker, more principled and reflective, a better communicator, looking for knowledge more in depth."

**Nour Joudeh, Logistic Sciences**

A wonderful adventure, in a spectacular country. Definitely a mind-blowing experience that shall always be remembered."

**Saifallah Qasim, Mechatronics Engineering**

"The year that shaped my life....One in a life time experience".

**Rima Jaber, Chemical-Pharmaceutical Engineering**

**Khaleel Qasim, Chemical – Pharmaceutical Engineering**

"I felt this year gone just like a day, this day was not a normal day in my life. It was full with joyful and unhappy moments, adventures and new experiences. But if I want to run through my impression in this year, I need more than one page to write it down. Maybe I can simplify all of these pages in one sentence 'this year is your key to the future'.

At the end stay only the memories from this year, and actually I would like to thank the German-Jordanian University for offering this opportunity, where this year could wide my horizon and help me to find the correct way in my future career."

"As we consorted with Europeans, we were able to overcome Stereotyping, as we showed our true colors for being upstanding citizens of the world and outstanding students from the GJU".

**Leen Al Farah, Pharmaceutical Engineering**

“Everything at Aalen University was different: students, lecturer, teaching method and of course the language. It was really very exciting experience.

Finding an internship was a big challenge because of the financial crisis. Nevertheless, and after 100 trials, I did my Internship in Carl Zeiss Vision. This helped me figure out many things related to my specialization, especially in production where I worked. The support of my internship supervisor was unlimited....”

**Nizar Shbikat, Industrial Engineering**

“What a journey... It did change my life literally. Simply a blessing.”

**Abdallah Al-Kilani, Mechatronics Engineering**

The year at all had supported me with a lot of advantages:

- meeting international cultures and getting in them, so that still friends online
- get me love my country ,my family and my big family more
- get exposed to the German culture and technology
- supported me with good future ideas
- supported me with some knowledge of Marketing at the company”.

**Mohammad Darabseh, Industrial Engineering**

“A year which includes most of my memories started on 24<sup>th</sup> of 2008. In this year, I got friends from the whole world, from Europe (including Germany), Asia, North America, South America and Australia. My internship was in a consulting office, it was interesting and useful. In general this year was one of the best in my life”.

**Abdullah Nsair, Energy Engineering**

“Spending a whole year in Germany was an enormous challenge for me. To be away from family and friends and to have an independent life! That created a mixture of feelings, which varied between enthusiasm and nervousness.

It was a great fun getting to know international and German students and at the same time trying to live the system there”.

This year created kind of challenge and agitation in my future career. I guess, or I hope I will earn from all the efforts I have done

**Aya Alassali, Chemical – Pharmaceutical Engineering**
