

Call for Applications

The Department of Computer Engineering at the German Jordanian University is glad to invite the graduate students in the department to participate in the *New Horizons Biomedical Informatics Observatories in Mediterranean Region* project that is funded by the Marie Curie Actions— International Research Staff Exchange Scheme (IRSES). The project aims to enhance the scientific collaboration between North-South Euro-Mediterranean countries, including Jordan, in the area of BioMedical Informatics (BMI) and establish a Jordanian BioMedical Informatics (BMI) association.

What are the funded activities provided by the project?

The project will provide the Graduate students with mobility funds to participate in several research, scientific, and educational activities related to BMI in one of the following countries: Greece, Turkey, and Spain.

Who can apply?

All M.Sc. students in the Department of Computer Engineering who completed more than 12 CHs and pursue research projects related to informatics and biomedical engineering can apply for the mobility grants provided by the project.

What are the prerequisites?

- Good written and oral English communication skills.
- Demonstrated competence in relevant disciplines, such as biomedical engineering, informatics, and networking.

What does the mobility grant include?

The program will provide the student with 1900 EUR per month. The student has to cover all costs related to the visit, including air tickets, visa fees, rent, and personal expenses.

How to apply?

Interested students should send their CV, a short description (1 paragraph) of their thesis project, and a scanned copy of their transcripts to cemaster@gju.edu.jo. **All applications should be submitted by December 17.**
