German Jordanian University (GJU) in Partnership with Nabih E. Azzam & Partners (NEA)

Professional Diploma in Quantity Surveying Program

The Program is Recognized by: the Royal Institution of Chartered Surveyors (RICS)

Certificates are Issued by the German Jordanian University and Authenticated by the Ministry of Higher Education

Program Goals

Develop Engineers' full knowledge of the duties of Quantity Surveyors and understand how they operate as cost managers within the construction industry.

Provide engineers with the practical scenarios designed to simulate services provided by the Quantity Surveyor, which start from feasibility and extend to the design and construction stages for any construction project.

Equip engineers with different construction elements and accordingly manage costs effectively and fairly across the board.

Program Requirements

Engineers applying for the Quantity Surveying Diploma should have a bachelor degree in Engineering or Architecture.

Program Duration:

The course duration is 9 months, over two academic semesters. Lectures will be held afternoon, two days a week.

Note: This program does not lead to an academic degree, and its trainingours do not count in case the trainee wishes to continue his/her studies for such a degree.
