**[h-index: 14](#)**

**[h<sub>i</sub> 10 index: 19](#)**

**Key Qualification :**

Manar Fayyad is the vice president of the German Jordanian University since 3/11/2013 till present.

She was a Professor of Analytical and Inorganic Chemistry at the University of Jordan since 1978 till her appointment as vice president at the German Jordanian University. Her specialization is in Inorganic / Analytical Chemistry and Water Management.

She was the director of the “Water and Environment Research and Study Center at the University of Jordan” from 1999-2007, and deputy director from 1992 till 1999.

Her research interests lie in the areas of water management, environmental pollution, and studies in the field of water, soil, wastewater treatment and reuse.

She was the Coordinator for seven years, and since 2006, of the bicultural master program on “Integrated water resources management”, executed in collaboration with Cologne University of Applied Sciences in Germany and funded by DAAD.

Dr. Fayyad was the Coordinator of the running project “Center of Natural Resources Development” and coordinated by Cologne University of Applied Sciences in Germany. This project is funded by the German Ministry of International Cooperation through DAAD. Thirteen universities from all over the world are members in the network of this project.

She was a member of the German Jordanian University board of trustees from 2009 till Nov. 2013.

From 2009 till Nov.,2013 , she was a member of the board of the “ Scientific Research Fund” at the Ministry of Higher Education in Jordan.

She was a member of the Jordanian Higher Education Accreditation Council/ Ministry of Higher Education( 2005-2007).

Also she coordinated for five years(2006-2011) the regional training program on “Transboundary water management in the MENA Region” funded by SIDA through the Swedish International Water Institute in Sweden.

She was the Regional Coordinator of the Future Water Leaders Program, component of the Blue Revolution Project funded by USAID( 2008-2009).

She was the Coordinator of the USAID funded program “Skills Enhancement and Support to Decision-Makers in Jordan’s Water Sector”, funded by USAID and was carried out in collaboration with Washington State University, Purdue University, Hashemite University and Jordan University for Science and Technology from 2000-2005

She is a member of the higher committee for Water Quality in Jordan/Ministry of Water and Irrigation since 1999 till present.

She was a member for the water policy team / Ministry of Water and irrigation who worked for the water quality conservation project funded by USAID (1993-1995).

Dr. Fayyad was a member in the “ National Selection Committee” for Global Environmental Facility Projects (small grants program/UNDP) in Jordan for seven years.

She was the Technical assessor for the accreditation of LEMA(Miyahuna )water quality labs.

Also , she has been nominated in 2013 to be a member of the board of Abdel Hamid Shoman Scientific Research Fund .

In 2013, she has been selected as a member of the foundation committee of the Network of Centers of Excellence in the MENA region, a project funded by the USAID .

She was and is still involved in preparation and execution of Water and Environment related projects funded by national and international agencies including UNDP, US-AID, CIDA, SIDA, and EU, and the German Government.

**Dr. Fayyad was the Supervising Professor of 75 graduate students, 6 in the Ph.D. level and 69 in the master level . She has 79 scientific publications.**

**Newly and in October 2014, she won the prize of the Arab Women Organization in Science and Technology for Development in the field of Environment.**

**Education :**

Ph.D. Chemistry: University of Bonn-Germany 1978  
M.Sc. Chemistry: University of Jordan 1974  
B.Sc. Chemistry: University of Jordan 1972

**Professional Experience:**

2013 till present: Vice president of the German Jordanian University

1978 -2013 : Professor of Analytical and Inorganic Chemistry, Chemistry Department, University of Jordan.

1999 -2007: Director of Water and Environment Research And Study Center / University of Jordan.

1992-1999: Deputy director of Water and Environment Research and Study Center/ Lab Director.

1998-1999: Staff member at the Chemistry Department/**Applied Science University (Sabbatical year).**

1993-1994: Staff member at the Chemistry Department at the **Applied Science University (Sabbatical year)**

**Prizes:**

- Arab Women Organization prize for Women in Science and Technology/ Environmental Sciences 2014.
- King Hussein Prize for top of seniors 1972.

**Projects and Studies :**

She participated in coordination and execution of the following projects:

1. EU funded project within Avicenne initiative on “Water Resources Management in Urban and Semi-Urban Areas of the Mediterranean Region“ in collaboration with the Center for Research and Documentation-Rome, Water and Environment Research and Study Center(WERSC)-University of Jordan, Netherlands, and Morocco.
2. BIOSYSWAT project on “A System Approach to Wastewater Biotreatment for the Protection of Mediterranean Coastal Areas (BIOWATSYS)” funded by EU/DG XII B through INCO-DC initiative with participating institutes from Jordan (WERSC), Italy, Greece, Morocco, and Egypt. The project aimed at using and testing low cost technologies for wastewater treatment using constructed wetland.
3. Using duckweed in wastewater treatment in collaboration with the Water Authority of Jordan . The project was funded by the Canadian International Development Agency (CIDA) from 1/7/96 for two years to study the possibility of using duckweed in further purification of treated wastewater.
4. The study of the effect of the treated wastewater plant on water resources in Kufrinja basin, and Tafeilah basin, funded by the General Association for Environment Protection from 1/9/96 for 14 months. The purpose is to evaluate the springs of Kufrinja basins on qualitative and quantitative basis, to study the effect of treated wastewater plants on the quality of the basin water.
5. Collaboration with Washington State University, funded by USAID/University Development Linkages Program (UDLP) for 5 years from 1/10/92 and the project was extended for one more year. The project aimed at improving the management of the natural resources in Jordan and Washington State through cooperation in applied research, technology transfer, and graduate education.
6. Long-term Studies on Water Conservation and Management in Arid and SemiArid Regions (Al-Azraq Oasis Project) (1994-1997). This is a joint project involving the Ministry of Water and Irrigation, Ministry of Rural Affairs and Environment, Royal Society for the

Conservation of Nature, and WERSC. The project has five components. WERSC was responsible for the component of the project that is related to enhancing groundwater artificial recharge by building desert dams and Gabions. Groundwater modeling and guidelines for water harvesting were developed. The project was funded by the United Nations Development Programme (UNDP) (Global Environmental Facility).

7. Purification and Reuse of Domestic Wastewater Using Low Cost Eco-Bio Technological Methods (1995-1998). Project goals were the optimization of design and construction of low cost Upflow Anaerobic Sludge Blanket reactors for anaerobic treatment of domestic wastewater in Jordan. Participants in the project were: Wageningen Agricultural University/The Netherlands, University of Valladolid/Spain, National Research Center/Egypt, Hebron University/WestBank, and WERSC/Jordan. The project was funded by the EC.
8. Removing Helminths from Wastewater by Using Solar Radiation, funded by EC through Avicenne Initiative for three years starting 1/1/95 and in collaboration with the Water Authority and the involvement of British Wallingford Institution, Portugal Ministry of Construction, and Tunisian Center for Water and Forestry. The project aimed at testing methods for disposal of infectious germs and parasites from wastewater using solar energy.

She coordinated and worked on the following projects:

1. The Sail-Op project on' Capacity Building on Wastewater Valorization for Agricultural Production in the Middle East Area by using low cost technologies funded by the Dutch government in collaboration with Wageningen University. The project started in 1997 and was planned to finish in 2001 and was extended till 2004.

2. Development of Cost Effective Reclamation for Domestic Wastewater and the Appropriate Agricultural Use of Treated Effluent Under Semi-arid Climate Conditions. The project was funded by EU INCO-MED initiative and was carried out in cooperation with Wageningen University/Holland ,the National Research Center /Egypt, Beir Zeit University/Palestine, and Crete University. The project started in 1999 and went on for three years.
3. Skills Enhancement and Support to Decision-Makers in Jordan's Water Sector, funded by USAID and is carried out in collaboration with Washington State University, Purdue University, Hashemite University and Jordan University for Science and Technology. The project involves preparation and delivery of training material in different water areas. Fifty different courses were delivered. Beside the training component, the project also involved evaluation of Zara/Maen waters in the Jordan valley for potential use for drinking purposes. The project started in March 2000, and finished in 2005.
4. Water Resources Management under Drought Conditions: Criteria and Tools for Conjunctive Use of Conventional and Marginal Waters in Mediterranean Regions. Funded by the EU, started 1997 and continued for three years. This Project was carried out in collaboration with Catania University/Italy, Ground Water Research Center /Egypt. Ministry of Agriculture/Cyprus.
5. Fate of disinfectants and their by-products in the Drinking Water Distribution Systems. The project is funded by the Higher Council of Science and Technology/Jordan . The duration of the project was two years (2001-2003).
6. Evaluation of Contamination with Organochlorine Pesticides in the Jordan Valley. Funded by the General Corporation for Environmental Protection. The project started in 2006 and is extended on yearly basis.

7. Mediterranean Development of innovative Technologies for Integrated Water Management, Meditate, funded by the EU started May, 2004 continued for four years. The project was carried out in collaboration of the WERSC with Montpellier University/France, Cranfield University/England, St. Joseph University/Lebanon.
8. Coordinator of the Master program in integrated water resource management with Cologne University of Applied Sciences funded by the Ministry of International Development in Germany, started 2006 and is still on-going.
9. Coordinating the International Training Program on Integrated Management of Transboundary Water Resources for the MENA Region, in collaboration with SIDA, Sweden (2006-2011)
10. Regional coordinator of the Future Water Leaders Program, component of the Blue Revolution Project funded by USAID, started 2007 and finished in 2009.
11. Profiling and Assessment of Chlorinated Hydrocarbons and Infectious Agents in Waters Supplying Zai Water Treatment Plant, funded by “Scientific Research Fund of the Ministry of Higher Education” , carried out in collaboration with the Royal Scientific Society, JUST University and Hashemite University. Time frame: 2009-2010.
12. Coordinator of “Center of excellence in natural resources” project funded by DAAD, in collaboration with Cologne University of Applied Sciences and 13 other countries around the world, time frame: 5 years. Ongoing.
13. Expanding Access to Sanitation for Unsewered Communities in the Middle East and North Africa Countries a newly USAID funded project implemented in collaboration with the Royal Scientific Society, and water institutions in

Morocco.(on going).

### **Training Material :**

1. Developed the Training course: Quality Control/ Quality Assurance in analysis. Submitted to Development Alternatives, Inc. (DAI). Ministry of Water and Irrigation, Nov. 1995.
2. Developed the training course : Dealing with International Agencies. Submitted to Development Alternatives Inc. (DAI). Ministry of Water and Irrigation, Nov. 1995.
3. Developed training course on” Characherization and analysis of physical and chemical parameters for Drinking water.
4. Preparation of training material on “Water safety plans” for the “Center of environmental health activities (CEHA,WHO) ”.

### **Books :**

1. Translation of a text book in Inorganic Chemistry into Arabic : (2 volumes) Inorganic Chemistry / Reactivity and Structure by J. Huheey. Manar Fayyad and Hamdallah Hodali.
2. Analytical Chemistry / Natural Science Program Al- Quds Open University, 1993.
3. Analytical Chemistry / Education Program. Manar Fayyad and Muhammad Zugul. Al- Quds Open University, 1994.
4. Participation in Preparing a Chemistry text book for high School. Ministry of Education,1995.
5. Chemistry of the Elements/Natural Science Program, Al-Quds Open Univ.,2000.

6. Translation of Canadian Handbook on Health Impact Assessment, CEHA, WHO, 2005.
7. Conservation of water in the Gulf Region, a book prepared for the Arab Trust Fund, 2006.
8. Drinking Water Disinfectants, a book written in Arabic, University of Jordan, 2009.
9. Book publication  
“Global Perspectives in Collaborative Degree Programs”;  
chapter “Institutional Perspectives”, 2013.
