MASTER'S THESIS

The Incidence of Venous Thromboembolism, Characteristics and Mortality Rate Among Hospitalized COVID-19 Patients in Jordan

Retrospective study using medical records of 351 critically ill COVID-19 patients admitted to two referral hospitals in Jordan between December 2020 and December 2021. Data were analyzed using descriptive statistics, independent-samples t-tests, and Pearson chi-square tests.

Key finding: VTE was identified in 13.1% of the study sample (46 of 351 patients). The thesis discussed clinical characteristics and implications for early recognition, prevention, and nursing education.

Supervisor: Prof. Mohammad Yousef Saleh | Successfully defended and approved in September 2022.
