

Dr. Eyad Hamad

Associate Professor, Biomedical Engineering Dept.

School of Applied Medical Sciences German Jordanian University. Naour-Amman, Jordan

Curriculum Vitae

Work Experience

06/2017 – Present	Associate Professor Biomedical Engineering Department School of Applied Medical Sciences German Jordanian University (Amman, Jordan)
9/2021 – Present	Vice Dean, School of Applied Medical Sciences German Jordanian University (Amman, Jordan)
9/2021 – Present	Exchange Coordinator Biomedical Engineering Department-SAMS German Jordanian University (Amman, Jordan)
2/2017 – 8/2018	Vice Dean, School of Applied Medical Sciences German Jordanian University (Amman, Jordan)
9/2016 – 8/2018	Exchange Coordinator Biomedical Engineering Department-SAMS German Jordanian University (Amman, Jordan)
10/2015 – 8/2016	Vice Dean, School of Applied Medical Sciences German Jordanian University (Amman, Jordan)
07/2015 – 9/2016	Visiting Researcher Bioelectronics (PGI-8/ICS-8) Research Institute Jülich (FZJ), Germany <ul style="list-style-type: none">• Establishing a new process of microfluidic device fabrication using 3D prototyping• Rapid prototyping and iterative testing of pre-simulated structures using a desktop SLA 3D printer• Inkjet printing of UV-curable adhesive and dielectric ink for microfluidic devices
06/2013 – 09/2015	Head of Biomedical Engineering Department (Chairman) School of Applied Medical Sciences German Jordanian University (Amman, Jordan) <ul style="list-style-type: none">• Devised new and enhanced plans of study for the Biomedical Engineering Department• Establishment of teaching labs for biomedical engineering undergraduates
02/2013 – 5/2017	Assistant Professor Biomedical Engineering Department School of Applied Medical Sciences German Jordanian University (Amman, Jordan)
07/2014 – 9/2014	Visiting Researcher Institute of Electromechanical Design Microtechnology und Electromechanical Systems Technische Universität Darmstadt (Darmstadt, Germany)

	<ul style="list-style-type: none"> Optimizing Efficiency of MEMS Actuators Production of Micro-electromechanical systems (MEMS) using Semiconductor lithography and thin-film structures and Microfluidics ANSYS Electrothermal Mechanical Simulations
12/2010 – 03/2011	Research Associate in “Sensors and Connected Health Research Group” University of Ulster (Belfast, UK) <ul style="list-style-type: none"> Development and evaluation of novel platform technology for the production of low-density microarray biochips for “Point-of-care applications” Production of point-of-care cardiac marker monitoring systems particularly for the early diagnosis and treatment of heart disease Impedimetric microsensors, microfluidics, and Lab-on-a-chip systems Semiconductor lithography and thin-film structures
11/2007 – 11/2010	Research Associate in “Sensors and Connected Health Research Group” including Ph.D. studies University of Ulster (Belfast, UK) <ul style="list-style-type: none"> Development of single-use devices as lab-on-a-chip Production of Micro-electromechanical systems (MEMS) Immobilizations of biochemical and medical molecules Undertaking measurements and analyzing the results Supervision of Master and Final Year Project Students
09/2006 – 06/2007	Research Assistant Fraunhofer Institute for Laser Technology -ILT (Aachen, Germany) <ul style="list-style-type: none"> Set-up temperature system for measuring temperature in tissue during laser coagulation Produce laser welds of consistent strength and durability. 2-dimensions measurement of the temperature during laser coagulation with a thermal camera Coagulation of albumin solder on porcine tissue and bonding of collagen membranes on porcine tissue Measurement of bonding strength and Correlation of the temperature signal with strength
09/1996 – 08/2004	Physics Teacher Jordan and Saudi Arabia
10/1995 – 08/1996	Physics Lab Instructor Philadelphia University (Amman, Jordan)
Training	
11/2012 – 01/2013	Professional Training: Communication technique, Rhetoric, Organisation and Management max40 GmbH (Stuttgart, Germany)
05/2012 – 10/2012	German Intensive Course (Level C1) EDUCOM, (Stuttgart, Germany)
11/2011 – 02/2012	German Intensive Course (Level B1) Deutsch-Kolleg an der Universität Vaihingen, (Stuttgart, Germany)
Education	
11/2007 – 04/2011	Ph.D. in Biomedical Engineering The University of Ulster, (Belfast, UK) Area of Interest: Sensors consisting of MEMS techniques, Semiconductor fabrications, electrochemical impedance spectroscopy, and Microfluidics Ph.D. Thesis: <i>„Impedimetric sensor for label-free point-of-care immunoassay cardiac marker systems”</i>
03/2005 – 06/2007	M.Sc. in Biomedical Engineering Aachen University of Applied Sciences (Aachen, Germany) Area of Interest: Biomedical Engineering, Laser technology, and Measurement technologies Grade: very good Master Thesis: <i>„Temperature measurement in biological tissue during laser coagulation”</i>

09/1991 – 06/1995

B.Sc. in Physics

Mu'tah University (Kerak, Jordan)

Grade: good

Teaching Experience

- Graduation-Level Course on **Research Methodologies**
- Undergraduate-level course on **Medical Signal Processing**
- Undergraduate-level course on **Signals and Systems**
- Undergraduate-level course on **Biosignals and Biosystems**
- Undergraduate-level course on **Biomaterials**
- Undergraduate-level course on **Medical Electronics I and II**
- Undergraduate-level course on **Biomedical Sensors and Transducers**
- Undergraduate-level course on **BioMEMS**
- Undergraduate-level course on **Numerical Methods for Engineers**
- Undergraduate-level course on **Medical Instrumentation**
- Undergraduate-level course on **Artificial Organs**

Funded Research Projects

Fabrication and characterization of impedance sensors on silicon/glass with varied gap and pitch interdigitated electrode structure designs. J.A. McLaughlin and Eyad Hamad, €26,215.00 Science Foundation Ireland (National Access Programme), 2009.

Optimizing Efficiency of MEMS Actuators, (SCHL 532/10-1) H. Schlaak and Eyad Hamad. €8,500 Deutsche Forschungsgemeinschaft, 2014.

Developing and Fabrication of Capacitive Micro Electromechanical System (MEMS) Interactive DC/AC Power Inverter for Renewable Energy Applications, 41250 JOD (\$58,098.60), Scientific Research Support Fund, 2015

Vocational training Center for undergraduate university students and teachers in Jordan, €689,938 Erasmus+, 2015.

3D-Prototypisierung von Mikrofluidik fuer die Zuleitung und Filtration von Vollblut auf einem Chip fuer Biosensoren, (SCHO 1243/3-1) M.J. Schoening and E. Hamad, €9,450. Deutsche Forschungsgemeinschaft, 2015.

Diversity Oriented Fluorescent Peptides as a Biomimicking Glucose Sensors, (BAS/1/7/2018) 135,400.00 JOD (\$190,705), Scientific Research Support Fund, 2018.

3D-prototyping of a microfluidic device for whole blood filtration in a Lab-on-Chip (SAMS/1/2019) 66,950.00 JOD (\$ 94,295)

Severe Illness Detection for Home-Quarantined COVID-19 Patients Using Wearable Sensors and IoT Technology (Cor-ENG 1/02/2020) 15025 JOD (\$21,191) Scientific Research Support Fund, 2020.

Development and Fabrication of Low-Cost, High-Tech Stretchable and Wearable Cardiac Sensor For Low-Resources Settings. 35800 JOD (\$50,493) Applied Research and Innovation Program (ARIF 2019) ALQUDS Academy for Scientific Research 2021.

Undergraduate Research Projects

- Flexible sensors know-how reuse platform with the implementation of failure detection system to aid in medical devices handling
- A Deep Learning Framework for Predicting the behavior of Siemens MR Systems
- Heat and Cool Treatment of Muscle Injuries Using the Thermo-electric Module
- Microfluidics for Blood separations based on Zweifach-Fung Bifurcation-law
- The Study of Impedance Detection Using Ink-Jet Printed Interdigitated Electrodes
- BCI command based for controlling a wheelchair using oscillatory brain activity
- Development of a Computer Programmable Pressure Supply
- Optimizing the NXT Mindstorms 2.0 for helping the Elderly and Visually Impaired People
- IR Glucose Biosensor, Proof of concept
- Enhancement of blood filtration using microfluidic channels: Optimization
- Living Cells in Electrowetting-based Assays
- Micro-Level Blood Separation: Enhancement of the Inlet Channel- Modelling and Simulation
- Digitalization of lateral flow assay

Professional Memberships	Senior Member , Institution of Engineering and Technology (IET) Member , Verein Deutscher Ingenieure (VDI) Member , Jordan Engineers Association (JEA) Member , Global Young Academy (GYA)	
Professional Services	<ul style="list-style-type: none"> - University council member 2014/2015 - University Scientific Research Committee 2017/2018 - School council for academic years 2013/2014, 2014/2015, 2015/2016, 2016/2017, 2017/2018, and 2018/2019 - School laboratory tenders Committee 2013/2014, 2014/2015, 2015/2016, and 2016/2017 - School study plan committee 2013/2014, 2014/2015 - School accreditation committee 2013/2014, 2014/2015 - School faculty recruitment committee 2013/2014, 2014/2015 - School scientific research committee 2013/2014, 2014/2015 - German Year Committee 2016/2017 	
Honors and Awards	EU Marie Curie EST Fellowship, Belfast, UK. 2007. Runner up, "present around the world", IET, Belfast, UK, 2009 Deutsche Forschungsgemeinschaft (DFG) Scholarship, Darmstadt, Germany, 2014 Deutsche Forschungsgemeinschaft (DFG) Scholarship, Jülich, Germany, 2015	
Reviewer	<ul style="list-style-type: none"> - Microsystem Technologies Journal - Jordan Journal of Mechanical and Industrial Engineering - Jordan Journal of Biological Sciences - IEEE EMBC 2018
