German Jordanian University Net-Zero Commitment

German Jordanian University Net-Zero Commitment

The German Jordanian University (GJU) is proud to announce its commitment to achieving net-zero carbon emissions by the year 2035. As a leading institution dedicated to academic excellence and sustainability, GJU recognizes the urgent need to address climate change and reduce its environmental impact.

To reach this goal, GJU will:

- Transition to renewable energy sources across all campuses.
- Enhance energy efficiency in buildings and infrastructure.
- Promote sustainable transportation and reduce carbon-intensive travel.
- Implement waste reduction and circular economy initiatives.
- Expand research and academic programs focused on climate solutions.

This commitment aligns with global sustainability goals and Jordan's vision for a greener future. GJU invites students, faculty, and partners to join in making this vision a reality.

Prof. Ala'aldeen Al-Halhouli

A blue ink signature of Prof. Ala'aldeen Al-Halhouli, written in a cursive style, positioned above the text 'President, German Jordanian University'.
