DESIRE: Development of higher Education teaching modules on the Socio-economic Impacts of the Renewable Energy implementation

Goal : To bring various stakeholders, e.g. regulators, industry, academia, and civil societies and NGOs, together to discuss the socio-economic impact of renewable energy and energy efficiency (REEE) implementation in Jordan.

Objectives: To give an insight on REEE development in Jordan as part of the Middle East and North Africa (MENA) region while also emphasizing on the socio-economic impact of REEE implementation in a developing economy. Finally, to raise awareness within in the REEE community in Jordan about the field of socio-economics.

Desired Outcomes: To improve the understanding and cohesion among the technical, social, and economical dimensions of successful REEE implementation.

Participants: Energy Service Companies (ESCOs), universities, Amman chamber of industry (ACI), ministries, international organizations, nongovernmental organizations (NGOs), civil society, local small business, and interested individuals.
