HIS MAJESTY KING ABDULLAH II

"Dear Chancellor Merkel, I can say that I am very satisfied with our cooperation on a bilateral level. Above all, with such successful projects as the German Jordanian University. This is certainly one of the most successful projects I've seen in my country in the last ten years. We hope that we can move forward on this basis even further."

HIS ROYAL HIGHNESS CROWN PRINCE AL-HUSSEIN BIN ABDULLAH II

PRESIDENT OF THE GERMAN JORDANIAN UNIVERSITY

Prof. Natheer Abu Obeid

To all our beloved GJU graduates,

Congratulations! I wish you good luck in your new endeavors and great success in your future careers.

This year marks the beginning of a new decade in the age of our university. As of today, GJU has exceeded 4000 students. While growing, all efforts have been made to sustain the excellent reputation and further build upon the great achievements that have been built over the past years, to continue to flourish as an excellent example of transnational applied education. As a result of this growth, the number of our German partner universities has exceeded (100). With its high rate of employment among our graduates, the university has succeeded in making the slogan "E for E" meaning "Education for

Employment" becoming a reality. For the coming decade, we are adopting the slogan "E for E and E" meaning "Education for Entrepreneurship and Employment." We have established a university level initiative for industrial linkage, which includes an ambitious, comprehensive program to integrate the industrial dimension within our academic programs in various disciplines. This is in addition to training our students for the creation of small businesses and self-employment. In this context, we have the vision to allocate a part of our campus to a business park and to industrial incubators linked with local, German and global companies. With the caliber of our graduates, I firmly believe that GJU will take a quantum leap in the

Jordanian society's point of view towards applied education, and to demonstrate the added value of diversification and flexibility in higher education. In the cultural dimension, the university could offer a viable model in international partnerships and in bridging between civilizations. Accordingly, I believe that GJU is not only an educational institution, but also it forms a case of enlightenment in higher education and cultural communication. This enables it to be an important cultural gateway for Jordan toward Germany and to the developed world. In sum, GJU stands as a lighthouse and works like a German machine. Again, I would like to warmly congratulate our dear graduates.

BOARD OF TRUSTEES

CHAIRMAN Eng. Othman Bedeir
