sustainable development**

Master's Degrees of Humanitarian Water, Sanitation and Hygiene (WaSH)

German Jordanian University (GJU), Action Against Hunger, and Bio force, in partnership with UNICEF and the Global WaSH Cluster and other humanitarian organization, started a WaSH Masters' Degree program in February 2021. The aim of this Masters is to build capacities of local WaSH specialists and help them provide the necessary human capital needed to deal with the region's response to humanitarian crises, while increasing the interest of future potential specialists to enter the field. This WaSH Masters' degree is a result of several years of work within water, sanitation and hygiene in humanitarian context across the region. The one and a half year academic program entails two semesters of theoretical education at GJU, a semester of practical internship in a humanitarian organization, and a final semester to complete the Master's thesis.

The University Offers a Master's Degree in Environmental and Renewable Energy Engineering

GJU Launches Water Security in Jordan Project

The German Jordanian University (GJU), through the School of Natural Resources Engineering and Management, in partnership with the TH Köln University of Applied Sciences, launched a project in Water Security in Jordan- from Data to Decision (WaterD2D), which is funded by the German Federal Ministry of Education and Research.

The project aims to promote the concept of "evidence based knowledge" as an effective tool for decision making towards a water secure Jordan, focusing on research questions triggered by the needs of the decision makers and stakeholders in responding to current and potential societal challenges.
