- 5-Lab technician at the University of Jordan.
- 6-teacher at Aljamea secondary school, teaching math and science for grades (1-9).

Statement philosophy:

I believe that each child is a unique individual who needs a secure, caring, and stimulating atmosphere in which to grow and mature emotionally, intellectually, physically, and socially. It is my desire as a educator to help students meet their fullest potential in these areas by providing an environment that is safe, supports risk-taking, and invites a sharing of ideas. There are three elements that I believe are conducive to establishing such an environment, (1) the teacher acting as a guide, (2) allowing the child's natural curiosity to direct his/her learning, and (3) promoting respect for all things and all people.

Every classroom presents a unique community of learners that varies not only in abilities, but also in learning styles. My role as a teacher is to give children the tools with which to cultivate their own gardens of knowledge. To accomplish this goal, I will teach to the needs of each child so that all learners can feel capable and successful. I will present curriculum that involves the interests of the children and makes learning relevant to life. I will incorporate themes, integrated units, projects, group work, individual work, and hands-on learning in order to make children active learners. Finally, I will tie learning into the world community to help children become caring and active members of society.
